## Machine tool

It is very important for machine tools to be controlled high precisely, to guarantee an optimal quality of the tools, which shall be produced. Therefore, we as professional Siemens Solution Partner use the CNC automation system SINUMERIK.

This modular and scalable automation system can be used in a lot of different branches, like tool industry, mold construction, medical technology, automotive engineering as well as aerospace engineering.

We are always keen to have a close contact to our customers and like to oblige their wishes.

**Following, you will find a small listing of plants we have already realized with our control concept:**

- 3D water-jet cutting machine
- Laser cutting machine
- Multi axis milling plant
